

Welcome to Evershine Coating Machinery

Welcome to Evershine Coating Machinery, where innovation meets excellence. Established in 2005, we have proudly emerged as a trusted leader in the manufacturing, wholesaling, and retailing of top-tier coating equipment and spray guns. As a Sole Proprietorship, our commitment to quality and customer satisfaction has been the cornerstone of our success. Located in the heart of New Delhi, our state-of-the-art infrastructural facility is the backbone of our operations. It enables us to deliver cutting-edge solutions tailored to meet the diverse needs of our clients across industries. Under the visionary leadership of our Manager, Nawal Kumar, Ever Shine Coating Machinery has carved a niche for itself in a highly competitive market, earning a reputation for reliability and excellence.

Brand	Evershine
Product Type	Powder Coating Machine
Usage/Application	INDUSTRIAL
Body Type	IRON & STEEL
Automation	Automatic semi, Auto

Under the meticulous supervision of our highly skilled professionals, we are providing high quality range

Powder Coating Machine

Our Products

**Powder Coating
Machine**

**Powder Recovery
Back To Back Booth**

Spray Gun

Powder Spray Booth

Capacity	CUSTOMIZED
Power Source	CUSTOMIZED
Usage/Application	INDUSTRIAL
Oven Type	Cabinet Ovens
Temperature	200-300 deg. Celsius

Under the meticulous supervision of our highly skilled professionals, we are providing high quality range

Diesel Heating Oven

Our Products

**CONVEYRIZED POWDER
COATING PLANT**

GAS FIRED OVEN

**DUST COLLECTOR
BAG**

CONVEYOR BELT WITH DRYER

Capacity	CUSTOMIZED
Power Source	CUSTOMIZED
Usage/Application	INDUSTRIAL
Oven Type	Cabinet Ovens
Temperature	200-300 deg. Celsius

Under the meticulous supervision of our highly skilled professionals, we are providing high quality range

Conveyor panel

Sensors and automation equipment

The most common requirement is a simple start / stop control.

We would normally include an additional variable speed control. This allows the speed to be adjusted to match conveyor or process equipment, up or downstream.

The addition of inverter drives within panels also provides a number of other benefits such as motor current protection.

PLC conveyor control panel

PLC control is used for more complex conveyor functions, . We are able to provide a turn-key package of conveyor equipment and panel design, from concept through build to installation and commissioning. Please contact our sales team to discuss your requirements.

conveyor control panel

This allows the speed to be adjusted to match conveyor or process equipment, up or downstream.

The addition of inverter drives within panels also provides a number of other benefits such as motor current protection.

Safety Equipment

Most basic conveyors should carry at least a remote stop linked to the start / stop circuit.

This coupled with the emergency stop function within the inverter is the bare minimum which should be adopted.

However within the panel for most complex conveyors an emergency stop safety relay and provision for safety interlocks can be added.

This adds an additional layer of safety to any conveyor system thereby protecting users of the equipment.

Sublimation Control Panel

AUTOMATIC POWDER COATING BOOTH, WITH Dust Collector Machine
